# Pednar Products

## Our foam and plastic components are integrated into dozens of industries, globally

Pednar Products designs & supplies foam and plastic components for everything from custom packaging and components to foam rollers – there is no application that we can't design and supply a finished product or a component for. With extensive experience in supplying foam and plastic products since 1988, we have already built and implemented solutions into thousands of different applications globally.

As everyone knows, 2020 was a unique and challenging year. Our experience and expertise in such a wide range of products and industries allowed Pednar to keep up with the quickly changing demands of our customers, and keep them supplied despite the circumstances.

With more than 200 years of cumulative experience, and the average employee being with us for more than 12 years, we think we know a thing or two about how to get your product from concept to commercialization.

Our roots go back to 1978 when I started working for the biggest foam fabricator in the industry. One day, they decided to initiate a high dollar minimum order. After fielding call after call from angry customers who had a smaller budget, I knew there was a better way and Pednar Products was born. Now, over 30 years later we have become the industry leader in foam rollers used in the Medical, Sports and Leisure, Chiropractic, Physical Therapy, and Fitness & Yoga industries as well as private label products for on-line and brick and mortar retail. In addition to the industries above, we service most industrial markets including packaging, gaskets, cushions, acoustics, and many more.

Please give us a try, you will find our prices competitive and our customer service unparalleled. If we fail to deliver, I want to hear from you personally.

**- Art Narevsky, Owner**

CUSTOM MADE

## Foam Products

Supplying everything in foam and plastics for manufacturers across the globe.

On top of supplying custom foam for varying industry applications, Pednar also specializes in foam for specific products such as sponges and foam cubes for trampoline parks.

## Industry Applications

Our foam and plastic components are integrated into dozens of manufacturing industries globally.

Foam & plastic make the world go 'round – so we are doing our part to help. We supply foam and plastic components that are seamlessly integrated into the following industries:

	Acoustical Foam	Extruded Foam
Foam Gaskets	Sports & Recreation	Medical & PPE
Foam Rollers	Household Goods & Sponges	Industrial
Maritime	Automotive	Custom Applications

## EXPANDED POLYPROPYLENE FOAM ROLLERS

EPP rollers are the benchmark in foam rolling. Made out of Expanded Polypropylene, these rollers have a solid feel, and are very durable. The firmness is just right for most athletes and fitness enthusiasts. Lightweight, and easy to clean, and available in a variety of colors and styles, EPP rollers will give your customers years of use.

## EXTRUDED FOAM ROLLERS

Pednar Products is proud to be the largest supplier of Foam Rollers in the United States. Starting almost 20 years ago providing rollers to the physical therapy industry and growing the market beyond medical applications to Fitness Companies and On-line suppliers who provide rollers to virtually every consumer, Pednar has been a leader in the industry since day one.

We can provide a variety of styles and materials to fulfill your every foam roller requirement from our various manufacturing facilities, and always made here in the USA. We will be competitive with imported versions, without the risks and lead time normally associated with import products. Custom designs are always welcome, as custom roller designs are always a possibility.

## EXTRUDED FOAM PRODUCTS

Extruded foam is a custom engineered foam product and component for a wide range of markets including construction, home furnishings, packaging, fitness & recreation and more. Extrusion is a continuous high production volume process that typically generates a lower cost per part. Extruded foam has good mechanical properties and surface finish, especially when compared to fabricated parts. A variety of in-line and offline converting processes are available, including coated skins and partial cutting (slitting).

## MEDICAL PRODUCTS

Foam is found throughout the medical care system – and you can find Pednar Products at every turn. Wound care and scar management, cannulas, hand exercisers, adhesive padding, passive massage and trigger point accessories, respiratory filtration and wearable accessories, sharps management systems, rehabilitation and mobility products, padding/splinting/bracing, disposable swabs, and other test kit materials and much more. With over 30 years in supplying products and services to the medical industry, we offer the medical industry a comprehensive array of materials and services.

## JUVENILE PRODUCTS

We've made a career out of developing creative solutions to bring innovative designs to life. Pednar has 30 years of experience in cutting, gluing, and assembling the kid's products that help mold and shape the future. From the cradle, to the playground, and into the classroom, we help create the products that help our kids play and learn.

## GASKETS

"We're closed" – that's not a bad thing when you're trying to seal up something important. Whether you're trying to keep something in or out, we can help you do it. We can make seals & gaskets from open or closed cell materials, with and without adhesive, in small or large formats, and in any quantity you need.

## COSTUMING

You'll find Pednar in the most unexpected places... like just under the surface of a lot of fantastic costumes! Sometimes it takes the perfect piece of custom foam to get a costume ready for the stage. Contact us to custom cut or mold the shapes you need.

## SCUM ABSORBING SPONGES

Unique open cell material that will absorb body oils, suntan lotions, cosmetics, etc. and help prevent a scum line from forming around your pool or spa, without absorbing any water.

## ACOUSTICAL FOAM

Widely used-For professional acoustic control, sound absorption and reverberation reduction. By attenuating excess sound waves to obtain better recording effects, it is widely used in concert halls, recording studios, home theaters, offices, etc. to reduce and absorb unwanted echoes, waves, reverb, and flutter echoes.

## POOL COVE/WALL FOAM

Pednar proudly serves the pool construction market with our Pool Cove Foam and our Wall Foam. Pool Cove Foam are 48" long and have an adhesive backing for easy application. Pool Wall Foam can be individually boxed for convenient shipping. Our standard sizes are 60ft, 75ft, 85ft, 100ft and 125ft long rolls, but we have the ability for custom lengths to meet your needs.

## FOAM PIT BLOCKS

Pednar Products offers shipping locations in two strategic locations to help with your freight costs: Knoxville TN and Los Angeles CA. We have over 10 colors in stock, and can customize your exact color needs (minimum order required, usually approximately 10,000 cubes 8"). We also offer Glow In The Dark cubes, which are great for your Friday night or Saturday night Glow Parties! Inquire within to learn more and get pricing. All foam meets ASTM standards and CAL 117. Anti microbial and additional Fire Retardants are available upon request.

Need to layer the bottom of your foam pit? We offer foam sheets in any size to layer the bottom of your foam pits, adding an extra layer of safety. We stock a host of different densities to fit your specific needs.

In 2021, we introduced our new Foam Pit Block Calculator tool. To use it, click on the button below or scan the QR code, then enter in the dimensions of your pit. Our calculator will tell you exactly how many 6 or 8 inch blocks you will need!

## MOLDED FOAM PRODUCTS

Pednar is an innovator in molded foam parts and products. Using a wide variety of materials such as Expanded Polypropylene (EPP), Expanded Polyethylene (EPE), EPS (Expanded Polystyrene) as well as some new and innovative materials and polymers, we can take your concept to completion for both finished products and components for use in medical, automotive, fitness and general use markets.

## PLAYGROUND PADDING

Our padding is widely used in playgrounds and athletic fields to keep children safe during play. Resistant to water and ultraviolet rays, Padding foam can be installed on children's climbing systems, athletic field dugout poles and outfield fences.

Pads are a closed-cell, polyethylene foam tube that is manufactured with a durable, secondary skin that increases resistance to environmental elements and extends the life of the product. Pads are pre-slit for easy installation and comes in a variety of colors.

## SPECIALTY FOAM MANUFACTURING

As part of Pednar's diverse capabilities in foam manufacturing we strive for success in complex market niches. Acoustical foam fabrication is one of them. Pednar works with foamers to dial in foam types to meet client's diverse material specifications for sound absorption, IFD, density, cell structure and branded colors to name a few important areas.

We strive for careful document control notating details throughout each project for total supply chain accountability and traceability of each part produced. We cut to client prints and require written first article approval prior to production to be sure that what is produced in production meets print and client expectations. All product produced is then bulk packaged or packaged in client specific retail packaging for market distribution. Let Pednar handle your complex projects such as acoustics or similar complicated projects.
